

WHO TAKES CARE OF OUR WATER?

CA Department of Water Resources manages the State Water Project

The State Water Project moves water from Northern CA to Southern CA through the CA Aqueduct

San Gabriel Valley Municipal Water District moves the water to the SGV area

Spreading Grounds

San Gabriel Basin Water Quality Authority cleans up and prevents the spread of contaminated groundwater

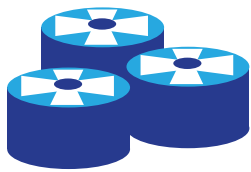

San Gabriel Basin

LA County Department of Public Works oversees water in the spreading grounds that add to our groundwater supplies

Main San Gabriel Basin Watermaster manages our groundwater in the San Gabriel Basin

Water Treatment Plant

Cities pump up and clean the groundwater

Cities distribute clean water to us

We get clean water!

Our responsibility to check water pipes in our homes and manage water use

To learn more about local water issues and ways to get involved, join our Sustainable SGV Coalition and meet other residents who are passionate about cultivating safe and healthy communities: bit.ly/ssgvcoalition
